

Alpha Sports GOES LEAD FREE

Greenville, SC – 2013 - Alpha Sports is going lead free on all Alpha Turf and Alpha Brand products! This is in every polyethylene, polypropylene, and nylon fiber that is used in manufacturing. All materials are either currently lead free or are in the process of converting to lead free. Alpha Sports Inc is working closely with yarn manufacturers to ensure that only the highest quality lead free yarns are used in the production of every Alpha Turf style.

For years, Alpha Sports Inc has offered a unique, 100% recyclable and lead free product line that provides superior performance, natural look, and environmental sustainability. All Alpha Turf products are environmentally friendly and safe to use in any indoor or outdoor environment. Alpha Sports is the greenest artificial sports turf grass manufacturer in the world and is committed to producing the safest and most ecologically friendly synthetic grass on the market through tireless innovation and product development.
